

Drake Successfully Negotiates Settlement of \$1 Million for Client Hit by Parking Lot Cleaning Truck

While on her way home from work at Delta, our client was hit head-on by a parking lot cleaning truck that was traveling far in excess of the posted speed limit. She barely survived the accident and remained in a coma for 25 days. Thereafter, she began the long and difficult road to recovery through rehabilitation and therapy. Unfortunately, she will never enjoy the same level of health she enjoyed prior to the accident.

In April of 2006, a complaint was filed against the two individuals, doing business as a partnership, who owned the truck. After conducting several months of comprehensive discovery, Drake found that these individuals only had \$1 Million of liability insurance. And, these individuals had no other significant assets that could satisfy a verdict/judgment in excess of policy limits. Thus, the case was settled in December of 2006 for policy limits of \$1 Million.
